

New Dallas pediatric campus

Our mission: to make life better for children

For more than 113 years, it has been our mission to make life better for children. Fulfilling our mission has never been as important as it is today, as the North Texas pediatric population expands in one of the fastest-growing regions in the U.S. Children's HealthSM and UT Southwestern, who began collaborating more than 60 years ago, are building a new pediatric campus to ensure we meet this demand. This new Dallas pediatric campus will be a destination for leading-edge patient care, emerging treatments and will provide the infrastructure needed to transform health care for the most complex pediatric patients. It will also serve as a hub for innovations, academic research and the development of lifesaving technologies to provide exemplary care for children for decades to come.

Incredible facts. Incredible new space.

If everyone stood hand in hand, it would take

1,800 people to create a ring around the new pediatric campus construction site

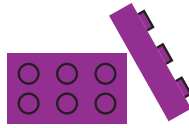

The hospital, set to be 240 feet tall, is **taller than the Statue of Liberty**, which is 151 feet tall

If you stacked all the Harry Potter books, it would take **1,680 books** to equal the height of the hospital

The new hospital is built on the site of **Mickey Mantle's old bowling alley and restaurant**

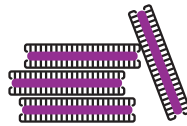

It would take more than **1 billion blocks** to build the hospital out of Lego® blocks

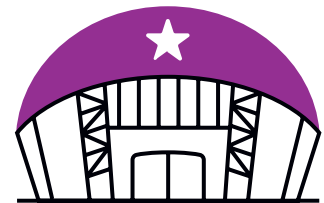

The campus will have **more than 20 acres of green space**

Each lap around the new pediatric campus is **1 mile**

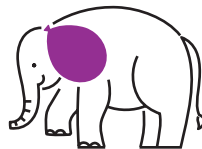

The hospital is **as tall as 2,880 stacked Oreo® cookies**

The new pediatric campus, set to be more than 5 million square feet, **will be larger than AT&T Stadium**, home of the Dallas Cowboys, which is 3 million square feet

The site (1,260 feet) is **longer than the Empire State Building is tall** (1,250 feet)

The inpatient tower, set to be 240 feet tall, is **as tall as a tower of 24 elephants**
