Postdoctoral Program Admissions

Briefly describe in narrative form important information to assist potential applicants in assessing their likely fit with your program. This description must be consistent with the program's policies on resident selection and practicum and academic preparation requirements:

Applicants for the Postdoctoral Fellowship in Clinical Child Psychology at Children's HealthSM must have a Ph.D. or Psy.D. from an APA-accredited graduate program in Clinical, Counseling, or School Psychology, as well as an APA-accredited internship. Doctoral degree conferral must be expected by late August/early September of the year the applicant would begin fellowship training. Applications must be submitted via the APPIC APPA-CAS web portal, where applicants will indicate their concentration/position of interest (e.g, Eating Disorders, Outpatient Psychology or Pediatric Health Psychology).

Applications are initially reviewed by the primary supervisors of each fellowship concentration area. Multiple sources of information, including academic preparation, clinical experience, future career goals, letters of recommendation, progress toward satisfactory completion of the graduate program's requirements, and work samples (if applicable), are considered. An emphasis is placed on finding applicants who represent a good fit with the program; therefore, background experience and clear demonstration of interest in the type of training offered at Children's Health is emphasized throughout the selection process. Applicants whose previous experiences and career goals are well matched with the postdoctoral training program at Children's Health are invited to participate in an on-site or phone interview.

After completion of interviews with program faculty and staff, applicants will be ranked by supervisor selection teams and offers will be extended, following the APPIC postdoctoral selection standards.

Describe any other required minimum criteria used to screen applicants:

All applicants will complete the training program's degree conferral attestation form. This form requires the applicant and his or her director of clinical training to verify the date that the applicant will have their doctoral degree conferred. The date of degree conferral that will be printed on the applicant's graduate transcripts must be prior to the start date of the fellowship year when the applicant will begin accruing hours of postdoctoral training.

Financial and Other Benefit Support for Upcoming Training Year

Annual Stipend/Salary for Full-time Residents	\$61,008
Annual Stipend/Salary for Half-time Residents	N/A
Program provides access to medical insurance for resident?	Yes
