

31ST ANNUAL

# WILL YOU BE MY MATCH?

Consider becoming a blood stem cell donor and register on Valentine's Day. **Your registration could save a life.**

## DONOR REGISTRY DRIVE

Children's Health<sup>SM</sup> is excited to support Be the Match for our 31st year! This international program connects patients with life-threatening blood cancers, blood disorders and other diseases with non-related registered members who are willing to donate healthy marrow or blood stem cells. Thousands of patients depend on the Be The Match Registry to find a genetically matched blood stem cell donor in order to save their lives.

We encourage everyone between 18 to 40 years old to join the Be The Match Registry during the month of February.

Together, we can save more children, more daughters, sons, brothers, sisters, nieces, nephews, cousins and friends.

### Register today!

Learn how to register online at [childrens.com/bethematch](http://childrens.com/bethematch)

### Want to learn more or get involved?
