EPIC ELECTRONIC MEDICAL RECORD SOFTWARE

Children's Health℠ is proud to offer you an opportunity to have Epic Electronic Medical Record software in your clinic via our Physician EMR team.

Epic is an affordable, simple to use EMR system that offers an all-inclusive platform to ensure your practice runs smoothly. We offer the practice management modules that include registration, scheduling and billing as well as the state of the art clinical documentation module. Epic will enhance the safety of your patients and automate many of your daily operations*.

Epic is a leader in EMR software development and is cutting edge when it comes to new technology. It has been used successfully throughout our entire organization since 2007. The Epic EMR promotes better outcomes and rapid access to your patients' information, for both your clinic and any Children's Health visits.

Epic offering limited to Children's Health Care Network members

To learn more about the Children's Health Care Network and Epic system, please email us at carenetwork@childrens.com.
